SWORNIM MAHARJAN

Full-Stack Developer · AI-First Builder

Hurstville, NSW 2220 | 0416 052 199 | swornimaus@gmail.com | swornim.vercel.app | github.com/swornimjr | linkedin.com/in/swornim-maharjan

SUMMARY

Full-stack MERN developer who uses AI as a primary build tool — not a shortcut. I've built several real production applications, each for a specific person solving a real problem. I don't wait for a spec. I see a problem, design a solution, and build it. The cafe where I work told me they had been planning to commission the exact system I built for them — unprompted. My full story is on my portfolio at swornim.vercel.app.

PROJECTS — SHIPPED, LIVE, REAL

Cafe Hub · **MERN Stack** · cafehubs.vercel.app

The cafe where I work managed staff rosters through WhatsApp. Nobody asked me to fix it. I designed and built a full business management system — staff scheduling, shift assignment, automated email notifications, stock management, and a manager dashboard. When I showed them, they told me they had been talking about commissioning exactly this app weeks earlier.
Stack: React, Node.js, Express, MongoDB, Nodemailer, JWT, Vercel/Render

Kyoudai Hostel · **Full-Stack Platform** · kyoudaihostel.com

My parents run a student hostel in Kathmandu with no website and no logo. I built a full platform — room listings, availability checker, inspection request forms, admin portal, and a finance module with automated weekly email reports. Hosted on a live domain. Still running.
Stack: React, Node.js, Express, MongoDB, Resend, Cloudinary

MagFlow · **Magazine Distribution Operations Tool** · MERN MVP

Built an end-to-end operations tool for magazine distribution logistics — invoice import, OCR-based data extraction, bundle building, store allocation, and trolley picking workflows. Designed to replace a manual, spreadsheet-driven process with a single system.
Stack: React + Vite, Node.js, Express, MongoDB, OCR

AquaScape Inspire · **Pinterest-Style Community Platform** · Vercel

A full-stack social platform for aquascaping hobbyists — image sharing, user profiles, collections, save system, masonry grid, dark glass UI. Built to launch to Australian aquascaping communities.
Stack: React + Vite, Node.js, Express, MongoDB, Cloudinary, Tailwind CSS

Hamro Kirtipur · **Community Directory** · hamro-kirtipur.vercel.app

A local directory for Kirtipur, Nepal — 11 wards, business listings, interactive map, emergency contacts.
Stack: MERN, Maps API

Whistle Counter · **PWA** · pressure-cooker-whistle.vercel.app

Listens through the microphone, counts pressure cooker whistles, sounds an alarm. Built because my partner kept asking me to count whistles manually.
Stack: React, Web Audio API

HOW I BUILD

I use Claude as my primary development collaborator on every project. I think in prompts and pipelines as naturally as I think in functions and loops. I identify the problem, design the architecture, make the decisions, and own the outcome. Every project above was shipped faster and better because I treat AI as a power tool.

SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React, Vite

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Auth & Storage: JWT, httpOnly cookies, Cloudinary

DevOps: Git, GitHub, Vercel, Render

AI Tools: Claude (Anthropic), ChatGPT

EMPLOYMENT

WH Smith — Sydney International Airport

Help Desk, Press Department Assistant & Team Lead · 2023–2026

- Managed retail operations, team coordination, and stock in a high-volume airport environment.
- Internship completed June 2026 — available immediately for full-time roles.

Harrington

Graphic Designer · 2021–2022

- Brand assets, social media content, photo editing, website product updates.

EDUCATION

Master of Computer Science (Software Engineering) — University of Wollongong · 2025

BSc. Hons (Computing) — The British College, Kathmandu · 2021
